

CMS COMPLAINT MANAGEMENT
SYSTEM

RELEASE REPORT
VERSION 1.2.3

Executive Summary of Major Features & System Updates

Date: August 2026

Release Tag:	v1.2.3	Target Branch:	deploy	Previous Tag:	v1.2.2
Application:	Navy CMS Portal	DB Update:	Sub-Category Table & Priority Schema	Release Type:	Major Feature Update

Key Features & Major Updates

1. Complete Sub-Category Management Module
- **Dedicated Sub-Category Administration:** New full CRUD module at /admin/sub-category allowing admins to define and manage sub-categories mapped directly under parent complaint categories.
 - **Dynamic Complaint Dropdowns:** Instant asynchronous loading of sub-categories based on selected Category in Complaint Registration and Edit forms.
 - **Dashboard & Complaint List Filters:** Multi-select Sub-Category filtering integrated into the Dashboard KPI stats, breakdown analytics, and Complaints management view.
2. Sub-Category Role & Permission Governance
- **Granular Access Control:** Integrated Sub-Category view/manage permissions into Role Management (/admin/roles) under Complaints Management.
 - **Protected Navigation:** Role-based authorization gates added to sidebar navigation and route middleware for independent access security.
3. 3x3 Registration Grid & Category-Dependent Employee Assignment
- **Standardized 3x3 Form Layout:** Streamlined complaint registration and editing into an organized 3-row grid (Category, Sub-Category, Type | Priority, Availability, Assigned Technician | Description).
 - **Technician Misassignment Prevention:** Assign Employee dropdown dynamically scopes technicians to the selected Category, remaining locked until a category is chosen to prevent cross-trade technician assignment.
4. Complaint Assignment Transition to 'In Progress'
- **Optimized Status Workflow:** Assigning an unassigned complaint to a technician now automatically transitions its status directly to **In Progress** (STATUS_IN_PROGRESS = 0).
 - **Notification Alignment:** Client status update alerts immediately reflect the In-Progress state upon technician dispatch.
5. Universal QR Code Public Feedback Workflow
- **All-Status Feedback Access:** Clients can now submit QR code satisfaction feedback on complaints of any status (removing previous restrictive lock).
 - **Staff Status Governance:** Decoupled feedback submission from automated status overrides, allowing the complaint office to manage complaint resolution lifecycle manually.
6. Dashboard Complaints Modal — 8-Column PDF Export
- **One-Click Landscape PDF:** Added a dedicated 'Export to PDF' capability in Dashboard popup modals.
 - **Formatted Report Columns:** Generates a clean A4 landscape document containing 8 essential fields: *CMP-ID, Register Date, House No, Category, Sub Category, Type, Priority, and Description*.
7. One-Click Excel / CSV Export Tools
- **Employee Roster Export:** Instant export button on Employee Management (/admin/employees) to download complete staff rosters.
 - **House Registry Export:** Direct export capability on Houses Management (/admin/houses) for complete residential property records.
8. Standardized Emergency vs Normal Priority System
- **Visual Priority Badging:** Standardized priority classification (Emergency vs Normal) with color-coded badges across Print slips, complaint lists, modals, and client views.
